Advanced

SIP

The image shows the web-based configuration interface for the ASUS AX-112 SIP phone. The interface is titled "ASUS AX-112" and includes a navigation menu with "Status", "WAN", "SIP", "Advanced", "Management", and "Logout". The "SIP" tab is active, showing configuration for two SIP servers. The "SIP Server 1" section has the following fields: *IP (with a dropdown for "Automatic Discovery"), *Port (5060), Domain Name, Registration Expiration (checked, 3600), Outbound Proxy IP, Outbound Proxy Port (5082), Phone Number, Caller ID, Contact Port (5060), User Name, and Password (masked with asterisks). The "SIP Server 2" section has similar fields, but the Registration Expiration checkbox is unchecked. A "Misc." section is partially visible at the bottom.

SIP Server 1	
*IP:	<input type="text" value="Automatic Discovery"/> (IP or FQDN)
*Port:	<input type="text" value="5060"/>
Domain Name:	<input type="text"/>
<input checked="" type="checkbox"/> Registration Expiration:	<input type="text" value="3600"/>
Outbound Proxy IP:	<input type="text"/>
Outbound Proxy Port:	<input type="text" value="5082"/>
Phone Number:	<input type="text"/>
Caller ID:	<input type="text"/>
Contact Port:	<input type="text" value="5060"/>
User Name:	<input type="text"/>
Password:	<input type="password" value="*****"/>

SIP Server 2	
*IP:	<input type="text"/>
*Port:	<input type="text" value="5060"/>
Domain Name:	<input type="text"/>
<input type="checkbox"/> Registration Expiration:	<input type="text" value="3600"/>
Outbound Proxy IP:	<input type="text"/>
Outbound Proxy Port:	<input type="text" value="5082"/>
Phone Number:	<input type="text"/>
Caller ID:	<input type="text"/>
Contact Port:	<input type="text" value="5060"/>
User Name:	<input type="text"/>
Password:	<input type="password"/>
