MindTouch Deki Installation

Checking environment...

If you run into installation problems, please include the following lines.

 **Environment checked. You can install MindTouch Deki.**

Performing installation...

- **SUCCESS:** Connected to installation database.
- **SUCCESS:** Created database wikidb.
- Granting user permissions to wikiuser on wikidb...done.
- Creating stored procedures...done.
- Creating tables...done.
- **SUCCESS:** Created MindTouch Deki administrator account Admin
- **SUCCESS:** Generated API key and stored it in database.
- **SUCCESS:** Site language set to zh-tw.
- **SUCCESS:** Saved attachments path as /var/www/dekiwiki/attachments
- **SUCCESS:** Set your MindTouch Deki site name as Deki Wiki
- **SUCCESS:** Wrote LocalSettings.php to disk successfully.
- **SUCCESS:** Wrote mindtouch.deki.startup.xml to disk successfully.
- **SUCCESS:** Wrote mindtouch.host.conf to disk successfully.

 **Installation successful!**

16. ???????????/etc/dekiwiki???????????

But wait, you're not done yet!

Please run the following commands manually from the command line to complete your installation:

```
cd /var/www/dekiwiki/config
mkdir /etc/dekiwiki
cp -p mindtouch.host.conf /etc/dekiwiki
cp -p mindtouch.deki.startup.xml /etc/dekiwiki
cp -p LocalSettings.php /var/www/dekiwiki/
/etc/init.d/dekiwiki start
```

Additionally, you might want to clean up your configuration files:

```
cd /var/www/dekiwiki
rm config/mindtouch.host.conf
rm config/mindtouch.deki.startup.xml
rm config/LocalSettings.php
```
