**Router Name:**  
This is the specific name for the router, which you set on the *Setup* tab.

**MAC Address:**  
This is the router's MAC Address, as seen by your ISP.

**Firmware Version:**  
This is the router's current firmware.

**Current Time:**  
This is time received from the ntp server set on the *Setup / Basic Setup* tab.

**Uptime:**  
This is a measure of the time the router has been "up" and running.

**Load Average:**  
This is given as three numbers that represent the system load during the last one, five, and fifteen minute periods.
