

Diagram of OSSBox video out ports

The are five formats of video output in OSSBox:

DVI

AV-Out

S-Video Out

Component (Pr/Pb/Y) Out

D-SUB(VGA) Out (needs adapter)

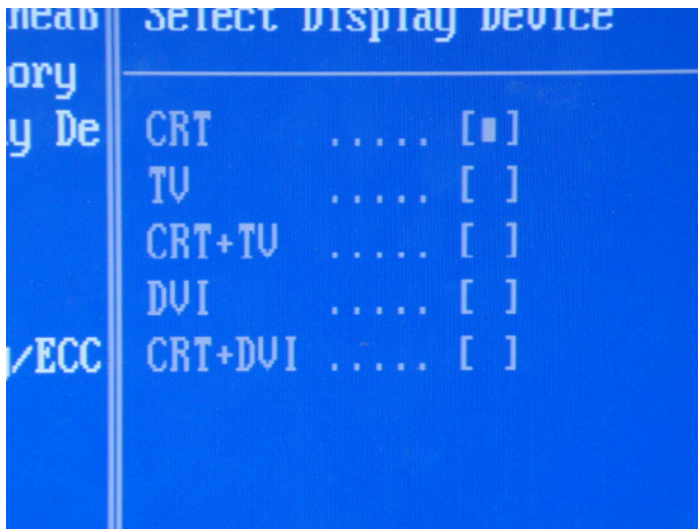

BIOS Settings

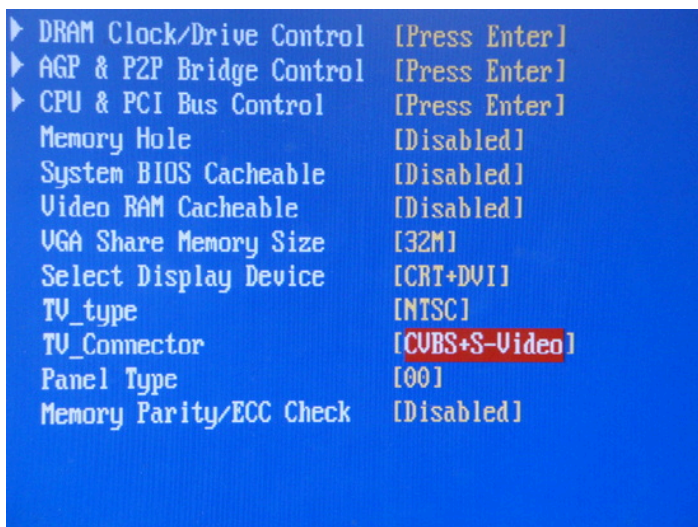

Different output formats require its own settings in BIOS

Advanced Chipset Features Press DEL to enter into BIOS and select Advanced Chipset Features

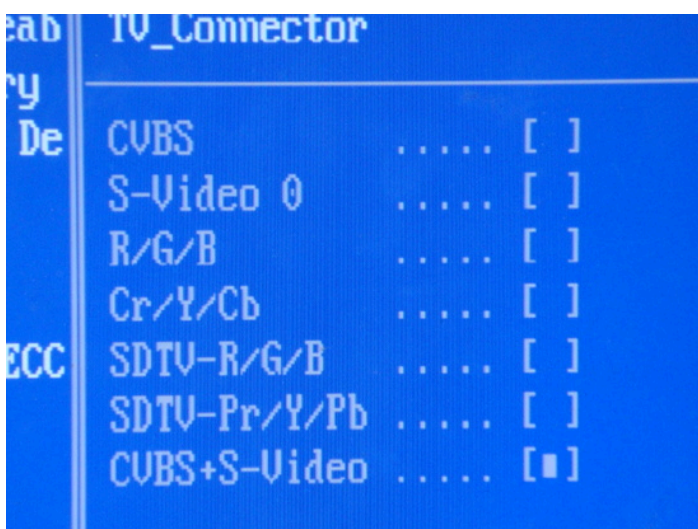

If the screen color is incorrect when using component-vedio out, re-enter into BIOS to select TV\_Connector in Advanced Chipset Features

Please select the input format that your monitor accepts.

Save settings before exit.
