## ?? Integrity

?????

<http://sourceforge.net/projects/inte...ar.gz/download>

????

```
tar xzf integrity-4.1.tar.gz  
cd integrity-4.1  
./configure --prefix=/opt/integrity  
make  
make install
```

????? /etc/integrity.conf

```
known=/root/known.cdb  
current=/root/current.cdb  
root=/mnt/your/directory/path
```

Tips:

```
known ??????????  
current ??????????
```

root ?????

????????????????????????????????

/opt/integrit/sbin/integrit -u -C /etc/integrit.conf -N?/root/known.cdb

???????

/opt/integrit/sbin/integrit -u -c -C /etc/integrit.conf

Tips:

- u update
- c ????
- C ????

??? perl script

???

1. ??????????????(????) ??????????????????
2. ?????????? mail ?????????? perl module?

???

reference to undefined name 'syntax' Exception of type 'MindTouch.Deki.Script.Runtime.DekiScriptUndefinedNameException' was thrown. (click for details)
