

Cross-Compile OpenSSL

NOTES?????? IAX2 ?????? Asterisk ??????????

Channel Drivers > [*] chan_iax2

Resource Modules > [*] res_crypto

????? res_crypto ?????????? openssl?????????FAQ [Install Asterisk 1.4/1.6/1.8 on Debian?](#)

wget http://www.openssl.org/source/openssl-1.0.1.tar.gz

```
./Configure linux-generic32 --prefix=/home/alang/ARM_Cross-Compile/build_opt/
openssl_build_by_codesourcery --openssldir=/home/alang/ARM_Cross-Compile/build_opt/
openssl_build_by_codesourcery shared
```

TIPs?

Configure?C ?????

????? shared????????? shared libraries(*.so)?

?? Makefile

...

```
CC= arm-none-linux-gnueabi-gcc
AR= arm-none-linux-gnueabi-ar $(ARFLAGS) r
RANLIB= arm-none-linux-gnueabi-ranlib
```

...

TIPs?

AR ?????? \$(ARFLAGS) r?

????

```
make
make install
```

TIPs

??? Asterisk ??????????

--with-crypto=<openssl?????> --with-ssl=<openssl?????>

Cross-Compile SQLite3

???? Asterisk 10.x

```
./configure CC=arm-none-linux-gnueabi-gcc CXX=arm-none-linux-gnueabi-g++
--host=arm-none-linux-gnueabi --prefix=/home/alang/ARM_Cross-Compile/build_opt/
sqlite3_build_by_codesourcery
make
make install
```

Cross-Compile Astrisk

for Asterisk 1.8.x

```
cd /home/alang/ARM_Cross-Compile/build_start/asterisk-1.8.10.1
```

```
./configure \
CC=arm-none-linux-gnueabi-gcc \
AR=arm-none-linux-gnueabi-ar \
CXX=arm-none-linux-gnueabi-g++ \
RANLIB=arm-none-linux-gnueabi-ranlib \
CPPFLAGS="-I/home/alang/ARM_Cross-Compile/build_opt/ncurses_build_by_codesourcery/include/
ncurses" \
LDFLAGS="-L/home/alang/ARM_Cross-Compile/build_opt/ncurses_build_by_codesourcery/lib" \
--host=arm-none-linux-gnueabi --target=arm-none-linux-gnueabi --without-pwlib --with-ncurses=/home/
alang/ARM_Cross-Compile/build_opt/ncurses_build_by_codesourcery --disable-xmldoc
--with-crypto=/home/alang/ARM_Cross-Compile/build_opt/openssl_build_by_codesourcery
--with-ssl=/home/alang/ARM_Cross-Compile/build_opt/openssl_build_by_codesourcery
```

```
make menuselect
```

```
make
```

```
make install DESTDIR=/home/alang/ARM_Cross-Compile/build_opt/asterisk18_arm
```

```
make samples DESTDIR=/home/alang/ARM_Cross-Compile/build_opt/asterisk18_arm
```

for Asterisk 10.x

??Asterisk 10 ?????? AST DB ?? SQLite3????????? SQLite3?

```
cd /home/alang/ARM_Cross-Compile/build_start/asterisk-10.2.1
```

```
./configure \
CC=arm-none-linux-gnueabi-gcc \
AR=arm-none-linux-gnueabi-ar \
CXX=arm-none-linux-gnueabi-g++ \
RANLIB=arm-none-linux-gnueabi-ranlib \
CPPFLAGS="-I/home/alang/ARM_Cross-Compile/build_opt/ncurses_build_by_codesourcery/include/
ncurses/" \
LDFLAGS="-L/home/alang/ARM_Cross-Compile/build_opt/ncurses_build_by_codesourcery/lib" \
--host=arm-none-linux-gnueabi --target=arm-none-linux-gnueabi --without-pwlib --with-ncurses=/home/
alang/ARM_Cross-Compile/build_opt/ncurses_build_by_codesourcery --with-sqlite3=/home/alang/
```

ARM_Cross-Compile/build_opt/sqlite3_build_by_codesourcery --disable-xml doc

make menuselect

make

make install DESTDIR=/home/alang/ARM_Cross-Compile/build_opt/

asterisk10_arm_build_by_codesourcery

make samples DESTDIR=/home/alang/ARM_Cross-Compile/build_opt/

asterisk10_arm_build_by_codesourcery

TIPS

- CPPFLAGS ??? -I<???? include ??>

- LDFLAGS ??? -L<???? library ??>

- ??? --prefix=???????????? Asterisk ?????????? /etc/asterisk/asterisk.conf?

- DESTDIR ? Asterisk ??????

FAQ

Q: ???cc1: warning: include location "/usr/include/SDL" is unsafe for cross-compilation
console_board.c:46:21: fatal error: SDL/SDL.h: No such file or directory

Ans??? SDL ???

sudo apt-get remove libsdl1.2-dev

Q: cross-compile OpenSSL ?????

checking for mandatory modules: NCURSES OPENSSSL... fail

configure: ***

configure: *** The OPENSSSL installation appears to be missing or broken.

Ans?

1. ?? <openssl ?????>/lib ??? *.so (shared libraries)???????????? openssl ?????

2. ?? Asterisk ?????????? --with-crypto=<openssl?????> --with-ssl=<openssl?????>?

Q: ?? Asterisk ????

fatal error: openssl/ssl.h: No such file or directory

Ans?? toolchain ?????? include ?? openssl ? include ??

cd <toolchain ?????>/arm-none-linux-gnueabi/include

ln -s <openssl ?????>/include/openssl ./

Q: ?? configure Asterisk ????

configure: error: *** termcap support not found (on modern systems, this typically means the ncurses

development package is missing)

Ans?? configure ??????

```
CPPFLAGS="-I<ncurses >/include/ncurses"
```

Q: ?? make Asterisk ????

configure: error: termcap support not found

make[1]: *** [editline/libedit.a] Error 1

make: *** [main] Error 2

Ans?? configure ??????

```
LDFLAGS="-L<ncurses >/lib"
```
