

```
#!/bin/sh
```

```
update_fb() {  
  count=$(wget -O - "http://api.facebook.com/  
restserver.php?method=links.getStats&urls=https://www.facebook.com/TaipeiHackerspace" 2>/dev/null  
| grep -oP "(?<=\<total\_count\>).*?(?=\</total\_count\>)"  
  
  echo "updating $count"  
  echo "$count." >&2  
}  
  
while [ 1 ]; do  
  update_fb  
  sleep 1  
done
```

Save as fb.sh, then run as follows:

```
$ ./fb.sh 2> /dev/ttyACM0
```
