- DEST_TBS: ? tablespace name
- ?? table_name ??? BIN$6Mo9ts+36IbgQKjA5sgLsA==$0????? table????????

reference to undefined name 'syntax' Exception of type
'MindTouch.Deki.Script.Runtime.DekiScriptUndefinedNameException' was thrown. (click for details)
??? procedure:

This procedure moves/rebuilds the tables/indexes of shema owners SUBBU/SUGGU to
usr_d_01, usr_x_01, usr_d_02 and usr_x_02 tablespaces as per the case condition.

You need to edit the CASE condition as per your database reorg requirements.
Test this procedure in a test db thoroughly, before running in a production db.
