

**?? Archive Log Mode ??**

????

```
SQL> archive log list
Database log mode      No Archive Mode
Automatic archival    Disabled
Archive destination    USE_DB_RECOVERY_FILE_DEST
Oldest online log sequence  2178
Current log sequence    2180
```

```
SQL> select log_mode, open_mode, name from v$database;
```

```
LOG_MODE  OPEN_MODE NAME
-----
NOARCHIVELOG READ WRITE WIN
```

????

```
SQL> archive log list
Database log mode      Archive Mode
Automatic archival    Enabled
Archive destination    /opt/oracle/arclog
Oldest online log sequence  2178
Next log sequence to archive  2180
Current log sequence    2180
```

**????? Archive Log**

NOTE:

1. ??? Archive Log ???????? DB????? downtime????????????? log\_archive\_dest\_1?
2. log\_archive\_dest ? log\_archive\_dest\_1 ??????????
3. ?????? log\_archive\_dest\_1?????????????
  - db\_recovery\_file\_dest = /opt/oracle/flash\_recovery\_area

**?? Archive Log ??????**

sqlplus / as sysdba

```
SQL> show parameters recovery_file_dest
```

```
NAME                TYPE        VALUE
-----
db_recovery_file_dest    string      /opt/oracle/flash_recovery_area
db_recovery_file_dest_size big integer  2G
```

```
SQL> alter system set log_archive_dest_1='LOCATION=/opt/oracle/arclog' scope=spfile;
```

```
SQL> alter system set log_archive_format='mysid_%s_%t_%r.arc' scope=spfile;
```

```
SQL> show parameters log_archive;
```

```
SQL> shutdown immediate
```

```
SQL> startup mount
```

```
SQL> show parameters log_archive
```

```
SQL> alter database archivelog;
```

```
SQL> alter database open;
```

```
SQL> archive log list
```

```
SQL> shutdown immediate
```

```
SQL> startup
```

Enable Force\_Logging

```
SQL> alter database force logging;
```

TIPS:

To disable Force Logging:

```
> alter database no force logging;
```

```
> alter tablespace <tablespace-name> no force logging;
```

To check the status:

```
> select log_mode,force_logging from v$database;
```

```
> select tablespace_name,logging,force_logging from dba_tablespaces;
```

??

```
SQL> alter system switch logfile;
```

?

```
SQL> alter system archive log current;
```

```
SQL> select log_mode, force_logging from v$database;
```

**?? Archive Log**

??

```
SQL> shutdown immediate
```

```
SQL> startup mount
```

```
SQL> alter database noarchivelog;
```

```
SQL> alter database open;
```

??

```
SQL> shutdown immediate
```

```
SQL> startup mount
SQL> alter database archivelog;
SQL> alter database open;
```
