

??

- CentOS 6.7 x86\_64
- Incredible PBX 13
- [CloudAtCost](#) Platform

????

```
setenforce 0
sed -i s/SELINUX=enforcing/SELINUX=disabled/g /etc/selinux/config
```

```
yum -y update
yum -y install net-tools wget tar
```

```
cd /root
wget http://incrediblepbx.com/incrediblepbx13-12.2-centos.tar.gz
tar zxvf incrediblepbx*
./IncrediblePBX*
```

????? CloudAtCost ?????

// For CloudAtCost only, prevent the root's password get reset every time you reboot.

```
sed -i '/exit 0/d' /etc/rc.local
killall plymouthd
echo killall plymouthd >> /etc/rc.local
rm -f /etc/rc3.d/S97*
echo "exit 0" >> /etc/rc.local
```

TIP?

CloudAtCost ??? VM?????????root ?????????????????????????????????

??????

```
// First step after installation
Make your root password very secure: passwd
Create admin password for Incredible PBX GUI access: /root/admin-pw-change
Create admin password for web apps: htpasswd /etc/pbx/wwwpasswd admin
Create joeuser password for web apps: htpasswd /etc/pbx/wwwpasswd joeuser
Set up UCP accounts for Voicemail & Recordings access using Incredible PBX GUI
Make a copy of your Knock codes: cat /root/knock.FAQ
Decipher IP address and other info about your server: status
Set your correct time zone: /root/timezone-setup
```
