

nTurbo?????NP4???????IPS?????. ???????flow-based UTM?traffic??NPU??. ???????CPU loading????.

NTurbo offloads firewall sessions that include flow-based security profiles to NP4 or NP6 network processors.

Without NTurbo, or with NTurbo disabled, all firewall sessions that include flow-based security profiles are processed by the FortiGate CPU.

NTurbo can only offload firewall sessions containing flow-based security profiles if the session could otherwise have been offloaded except for the presence of the flowbased security profiles. If something else prevents the session from being offloaded, NTurbo will not offload that session.

Firewall sessions that include proxy-based security profiles are never offloaded to network processors and are always processed by the FortiGate CPU.

nTurbo?????????:

1. ??proxy-based UTM
2. ??DoS-policy
