### From Local

check\_instances.sh

reference to undefined name 'syntax' Exception of type  
'MindTouch.Deki.Script.Runtime.DekiScriptUndefinedNameException' was thrown. (click for details)

### From Remote

#### 1. tnsping

- Oracle Client installation

NOTE: tnsping just check if the LISTENER service on the DB server is running

```
$> tnsping <TNS-Alias>
```

or

```
$> tnsping <db-server-ip>:1521/<SID>
```

#### 2. check\_db\_up.sql

- Oracle Client installation
- tnsnames.ora

```
whenever sqlerror exit 1;  
connect username/password@<<TNS alias>>  
select 1 from dual;  
exit 0;
```

Run your bash like the follows

```
sqlplus /nolog @check_db_up.sql
```

If that returns 1, there was an error and the database isn't up.
