VM ??? HVM, HVM PV ???

?????? Migrate VM??? migrate ??? VM ??????:

- VM ?????????? Kill ??
- VM ?????????????? top, poweroff

??? PVM, HVM, HVM PV

PVM:

The paravirtualized template contains a kernel that is recompiled to be made aware of the virtual environment. It runs at near native speed, with memory, disk and network access optimized for maximum performance.

HVM PV:

The hardware virtualized template contains a kernel that is not recompiled for the virtual environment, but contains additional paravirtualized (PV) drivers for improved performance.

? VM ?? Stop ?

???????? job ?????????? Kill ??? abort ??? job?????? ?? Kill ?????? VM?

NOTE: ?????????? VM ???? [Q & A](#)?
