Regression enables us to predict continuous values, such as house price prediction or stock market forecasting.

Keras: How to get started with Keras, Deep Learning, and Python

<https://www.pyimagesearch.com/2018/0...ng-and-python/>

1. Installing Keras and other dependencies on your system
2. Loading your data from disk
3. Creating your training and testing splits
4. Defining your Keras model architecture
5. Compiling your Keras model
6. Training your model on your training data
7. Evaluating your model on your test data
8. Making predictions using your trained Keras model

Deep Learning and Medical Image Analysis with Keras

- ResNet
- SGD optimizer
- ????????? train, validation, test ????
- Data Augmentation
- Decay learning rate after each epoch
