

DB2 Database Server v11.5

**CentOS/RedHat 6**

```
# yum install libaio ksh rsh-server sg3_utils pam-devel nfs-utils compat-libstdc++-33
# yum install libstdc++.i686 pam-devel.i686 compat-libstdc++-33.i686
```

TIP: ?????????????????? db2prereqcheck??

DBT3507E The db2prereqcheck utility failed to find the following package or file: "sg3\_utils".

????

```
tar xzf DB2_AESE_PVU_11.1_Svr_Linux_86-64.tar.gz
cd server_aese_c/
./db2prereqcheck -i
./db2_install -f NOTSAMP
```

?? FixPack 5

```
tar xzf v11.1.4fp5_linuxx64_universal_fixpack.tar.gz
cd universal/
./db2prereqcheck -i
./installFixPack
```

Enter the full path of the base installation directory:

-----  
/opt/ibm/db2/V11.1 <== ????????

Do you want to choose a different installation directory for the fix pack? [yes/no]

-----  
no <==
