

Incredible PBX

Post-Installation

Incredible PBX 2027 with Debian 11

Reset the hostname and password:

```
# Set the hostname
hostnamectl set-hostname <your-FQDN-name>

# Set the password
passwd          # for Root
admin-pw-change # for FreePBX
apache-pw-change # for Reminders and AsteriDex
```

Set Gmail as an SMTP Smarthost:

Create an App password for your Gmail account:

<https://support.google.com/accounts/answer/185833?hl=en>

```
/root/enable-gmail-smarthost-for-sendmail
```

Stop Webmin

```
systemctl stop webmin
systemctl disable webmin
```
