Q & A

0516-1398 extendvg

> 0516-1398 extendvg: The physical volume hdisk1, appears to belong to another volume group. Use the force option to add this physical volume to a volume group.

Solution:

```
extendvg -f rootvg hdisk1
```

File too large

> .//H11072988.iso: File too large

Solution:

Edit: `/etc/security/limits`

```
root:
    fsize = -1
```

Re-login then run the command

```
ulimit -a
```

vmount: Operation not permitted

???? NFS ??

> mount: 1831-008 giving up on:
> 192.168.99.1:/dataVol/aix_nfs
> vmount: Operation not permitted.

Solution:

```
# check nfs_use_reserved_ports if it is on 0 or 1

nfso -a

# Change nfs_use_reserved_ports to 1 until nextboot

nfso -o nfs_use_reserved_ports=1

# Make change to permanent value

nfso -po nfs_use_reserved_ports=1
```
