nginx-proxy

nginx-proxy sets up a container running nginx and docker-gen. docker-gen generates reverse proxy configs for nginx and reloads nginx when containers are started and stopped.

GoDoxy

A lightweight, simple, and performant reverse proxy with WebUI.

- GitHub: <https://github.com/yusing/godoxy>

Configuration

/etc/nginx/sites-available/default:

```
server {
    listen 80;
    server_name your-server-ip;

    location /pull-repo {
        proxy_pass http://localhost:5000;
        proxy_set_header Host $host;
        proxy_set_header X-Real-IP $remote_addr;
        proxy_set_header X-Forwarded-For $proxy_add_x_forwarded_for;
        proxy_set_header X-Forwarded-Proto $scheme;
    }
}
```
