

Snapcraft

Snappy????????????????????Canonical????Ubuntu????????????????????snap????????s
napd????????Linux????????????????????

- [Install Snapcraft](#)
- [Build from a Jar App](#)

Install Snapcraft

Mint 19.3

```
sudo snap install snapcraft --classic
```

Build from a Jar App

????

```
.
├─ app
│   └─ cc_wallet
│       └─ CloudCoin.D.4.0.0.jar
│   └─ CloudCoinWallet.sh
├─ dark.png
└─ snap
    └─ gui
        ├── cc_dark.png
        └─ cloudcoin-wallet.dark.desktop
    └─ snapcraft.yaml
```

snapcraft.yaml

```
name: cloudcoin-wallet
version: "4.0.0"
summary: CloudCoin Wallet(Dark) Desktop Application
base: core18
description: |
    CloudCoin is a digital currency. That cannot be counterfeited, controlled, tracked or stolen.
    CloudCoins cannot be double-spent, mined or lost.
    It is 100% private and requires no public ledgers, accounts, or encryption.
    CloudCoin is a completely fair and ethical monetary system.
